Dry Process : Dry Process Facilities in House

ETP PLANT

Category	: Chemicals & Biological Technology.
Capacity	: 25,000 liter/per hours.

We have got Environmental Certificate

Strict Quality Procedure:

We are committed to providing the highest quality products. All garments pass through strict quality check before we start any dry or wet process on it. When dry process is complete, a 2nd quality check any reject garment inter into the wet zone. After wash, a final quality check is placed to ensure highest quality level.

About us

We have all hi-technology equipment to do all kinds of fancy/trendy washes especially in Denims and garment dyeing. We have recruited all well experienced & technically sound people working as the top managements. The average age is 24 years, and the minimum age is 18 years. The working environment at our factories is very convenient. All the working areas are very clean, well-ventilated and adequately cooled. There are adequate exits in the event of emergencies and aisles are kept clear. Power supply, Gas, Water and all their utilities are available around the clock. We also have our own generator in the event of power failure. All the factories are following all applicable laws, regulations or statutes regarding health, building safety, fire and environmental issues.

“Finally, we are committed to provide best service and prompt delivery”

- JAF WASHING
